

# etherFAX for Xerox® ConnectKey®

## Cloud-Enables Xerox and MFP Devices

Through the integration of Xerox® ConnectKey®, etherFAX provides secure document and fax delivery via the cloud for Xerox copiers and multifunction printer (MFP) devices. All ConnectKey-enabled devices now have the capability to send and receive faxes without requiring a fax server, fax kit or costly fax telephony infrastructure.

A cloud transport service, etherFAX provides secure and ultra-fast transmission between ConnectKey-enabled devices and other fax servers, fax machines, EMRs, EHRs, and health care information exchanges. etherFAX fully supports advanced document types including high resolution color. A 50-page color document can be transmitted in seconds.

The integration with ConnectKey allows organizations to leverage cloud transport to send and receive business-critical documents with the utmost in security and reliability. With end-to-end encryption and guaranteed delivery, etherFAX is ideal for transmitting unstructured data such as paper-based documents, personally identifiable information (PII), forms, and notes.

### ENSURING DATA PRIVACY & COMPLIANCE

Supporting number validation, etherFAX verifies recipient fax numbers before initiating a connection, ensuring sensitive data is delivered to the appropriate destination.\* This is ideal for healthcare organizations that need to ensure HIPAA compliance.

### NATIVE FAX SERVER SUPPORT

etherFAX supports the Xerox Fax Server Service natively. Within minutes, Xerox devices can connect to etherFAX, without any customization or software integration.

### NPI & FAX-TO-DIRECT

etherFAX supports the National Provider Identifier (NPI) standard. Prior to sending a fax, it will present the preferred delivery method and capabilities (PDF, color, color TIFF and resolution). Additionally, the integration of ConnectKey facilitates Fax-to-Direct connections which allow healthcare organizations to transmit documents and data securely.

### Benefits:

- Supports High Resolution Color Docs
- Number Validation
- Advanced Document Type Validation
- Fully Supports All Data Compliance Requirements
- Does Not Require a Fax Server or Fax Kit
- Ultra-Fast Connections
- End-to-End Encryption
- Complete Audit Trail
- Guaranteed Delivery (with etherFAX SEN)

\* Number validation works for customers within the etherFAX ecosystem and/or the Fax Federation.

## Number Validation Capability

The screenshot shows the etherFAX software interface. At the top left is the etherFAX logo. On the top right are 'Exit' and 'Start' buttons. The main area is divided into several sections:

- Destination:** A text box containing the number '7325551212'.
- Sides:** Two buttons: '1-Sided' (selected) and '2-Sided'.
- Format:** Two buttons: 'Multi-Page TIFF' and 'PDF' (selected).
- Resolution:** Three buttons: '100 dpi (Low)', '200 dpi (High)', and '600 dpi (SEN)' (selected).
- Instructions:** A text box on the right that says: 'Place your originals in the document feeder or on the document glass and press 'Start''.
- Footer:** Text at the bottom left reads: 'Destination: Pearson Medical This document will be sent using Secure Exchange Network.'

When entering a destination, etherFAX's number validation capability returns the name of the corresponding organization along with the document types that can be accepted. This document will be sent across etherFAX Secure Exchange Network (SEN).
