# ETHERFAX®

Epic App Orchard Integration

etherFAX's integration with Epic enables healthcare organizations to exchange Protected Health Information (PHI) with end-to-end encryption, ultra-fast transmission speeds, and guaranteed delivery by connecting to etherFAX's DirectFax solution via the Epic App Orchard.

Why Use etherFAX's Epic App Orchard Integration?

Through the integration, Epic users can leverage the etherFAX Secure Exchange Network (SEN) to securely transport critical healthcare, business information, and rich content documents with near-diagnostic image quality via Epic Print Services (EPS) without having to change a single workflow. For guaranteed security and data protection, etherFAX services operate in a HIPAA and SOC 2® compliant environment that is both HITRUST CSF® and PCI DSS certified.

Features & Benefits

- Leverages an Epic-certified etherFAX solution that eliminates the ongoing cost and complexity of maintaining a physical fax infrastructure, including local PRIs, gateways, ports, and voice resources

- Works with Epic-based organizations to optimize the delivery and receipt of their vital documents

- Enables healthcare organizations to send and receive large, sensitive documents in seconds

- Best in KLAS Digital Fax Solution

- Monitor document delivery and fax status within Epic

- Leverage intelligent document recognition using AI and receive faxes into the Epic-integrated Hyland OnBase solution

- Consolidate or eliminate complex and resource-strained fax environments and costs

More Reasons to Switch

etherFAX's DirectFax solution via SEN enables Epic users to send and receive high-resolution, color documents directly to applications and devices with ultra-fast transmission speeds. As a cloud-based solution, etherFAX does not require a fax server or additional software.

Problems Solved

Work with Epic-based organizations to optimize the delivery and receipt of vital documents

Guaranteed-delivery, high-availability, "never busy" services within Epic workflow

High-resolution documents and faxes without a local fax server

Use Epic's built-in print and fax interface with easy fax monitoring

About etherFAX

With over six million connected endpoints, etherFAX is the world's largest document exchange network, supporting every major fax server, application, and fax-enabled device. Its secure document delivery platform and suite of applications are widely used across a broad range of industries to digitize workflows and optimize business processes. As a leading provider of hybrid-cloud fax solutions supporting healthcare enterprises, etherFAX securely transmits protected health information and high-resolution, color documents directly to applications and devices with end-to-end encryption and ultra-fast transmission speeds. etherFAX's secure, cloud-based, and encrypted data exchange solutions operate in a HIPAA and SOC 2® compliant environment that is both HITRUST CSF® and PCI DSS certified.
