

## DirectFax Messenger for Microsoft Teams

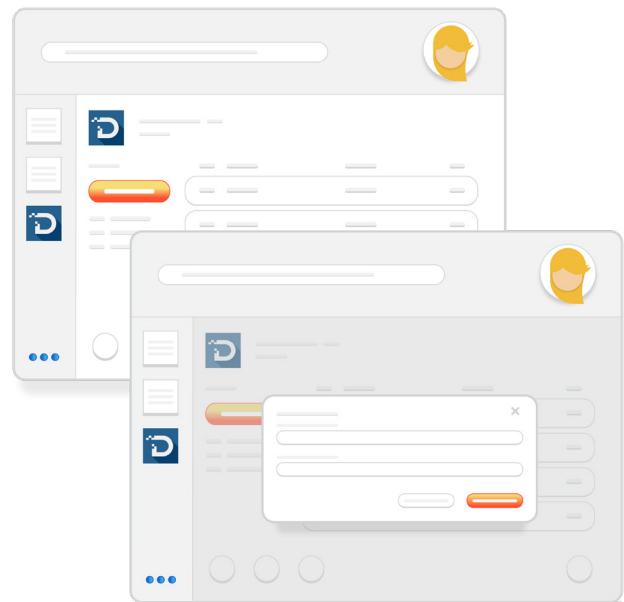

Securely send, receive, and view faxes directly in your Microsoft Teams account.

### Why Use DirectFax Messenger?

Now more than ever, employees are spending more time collaborating on MS Teams. To keep employees engaged and productive, it's imperative to reduce app switching - which often leads to app fatigue and redundant documentation. With etherFAX's DirectFax integration, users can leverage the collaborative features within Microsoft Teams without having to change their existing workflows.

### Features & Benefits

- Transmit secure, digital, high-resolution, rich color documents
- Eliminate the need for fax servers apps — creating seamless collaborative workflows
- Individual users can easily receive, send, and view your faxes directly in Teams
- View faxes in DirectFax's mailbox-style application in your existing Teams Channels
- Operates in a HIPAA and SOC 2® compliant environment that is both HITRUST CSF® and PCI DSS certified
- Greater utilization of your Teams collaboration tools saves you money while providing an additional way to communicate
- Simple drag-and-drop functionality
- Faxes are stored on your SharePoint site

## More Reasons to Switch

etherFAX's DirectFAX Messenger integration with MS Teams is a mobile fax application within the Teams app. Faxed documents are received as attachments and can be easily integrated into existing workflows. Also, the DirectFAX app for Teams scales to support any size remote or on-premise workforce.

## Problems Solved

Meet users where they are and keep them in their existing Teams environment to drive efficiency

Improve content management within your Teams channels

Protect business-critical documents with guaranteed security and end-to-end encryption

Eliminate disparate repositories that don't allow users to share documents in their current workflow
