

DirectFax® Messenger for Collaboration Apps

Securely send, receive, and view faxes directly in your Microsoft Teams and Slack accounts.

Why Use DirectFax Messenger for Your Collaboration Apps?

Now more than ever, employees are spending more time collaborating on apps like Microsoft Teams and Slack. To keep employees engaged and productive, it's imperative to reduce app switching – which often leads to app fatigue and redundant documentation. With etherFAX's DirectFax integration, users can leverage the collaborative features within MS Teams and Slack without having to change their existing workflows.

Features & Benefits

- Transmit secure, digital, high-resolution rich color documents
- Eliminate the need for fax server apps – creating seamless collaborative workflows
- Individual users can easily receive, send, and view faxes directly in MS Teams and Slack
- Operates in a HIPAA and SOC2® compliant environment that is both HITRUST CSF® and PCI DSS certified
- Collaboration tools can save you money while providing an additional way to collaborate
- Simple drag-and-drop functionality

Additionally, for Microsoft Teams

- View faxes in DirectFax's mailbox-style application in your existing Teams Channels
- Faxes are stored on your SharePoint site

More Reasons to Switch

etherFAX's DirectFax Messenger integration with Microsoft Teams and Slack is a mobile fax application within each app. Faxed documents are received as attachments and can be easily integrated into existing workflows. Also, DirectFax Messenger scales to support any size remote or on-premise workforce.

Problems Solved

Meet users where they are and keep them in their existing Teams and Slack environment to drive efficiency

Improve content management within your Teams and Slack channels

Protect business-critical documents with guaranteed security and end-to-end encryption

Eliminate disparate repositories that don't allow users to share documents in their current workflow
