# ETHERFAX®

Secure Exchange Network (SEN)

With over six million connected endpoints, the etherFAX Secure Exchange Network (SEN) is the world's largest fax network, supporting every major fax server, application and fax-enabled device. Best of all, systems within the etherFAX ecosystem can communicate directly with each other without the use of telephony. SEN is capable of sending color, high-resolution, documents and fully encrypted payloads with no change in the user experience (as all intelligence is built into our platform).

Why Use etherFAX SEN?

The etherFAX Secure Exchange Network (SEN) is a patented Infrastructure-as-a-Service solution. etherFAX SEN is the world's largest Software-Defined Network (SDN), leveraging hybrid-cloud technology to provide 100% secure communications. etherFAX's DirectFax solution via SEN provides users with guaranteed security and data protection, as etherFAX services operate in a HIPAA and SOC 2® compliant environment that is both HITRUST CSF® and PCI DSS certified.

Features & Benefits

- Guaranteed 100% secure delivery of your data and documents

- Receive high-quality (600 DPI) color images

- Send and receive faxes without ever traversing an external telephone network

- Seamless integration with industry-leading fax servers and fax-enabled applications

- Ultra-fast transmission speeds between endpoints that are always connected

- Never busy inbound, or outbound; never miss another fax

All product and company names are trademarks™ or registered® trademarks of their respective holders. Use of them does not imply any affiliation with or endorsement by them.

Problems Solved

End-to-end
data encryption

More than just fax – SEN can handle
digital data and document exchange

Eliminates on-premise fax
servers and their associated
maintenance costs

Guaranteed 100% secure delivery
of HIE that is HITRUST Certified
and HIPAA Compliant
